

MASP/ PSTA Campus

Furbish installed our EcoCline green roof on three projects spanning from 2014-2017 totaling more than 5.5 acres of vegetation. Each project presented an opportunity to partner and coordinate with the general contractors ranging from design/ build implementation, logistical coordination, and unforeseen winter weather conditions. All three projects were planted with sedum plugs at 2/sf; that's over 550,000 plugs!
