

Social Security Administration

This stunning 50' tall wall on the first floor atrium is a talking point for both employees and visitors. Designed to be installed set in the existing slate wall, this wall supports more than a dozen plant species, including many species that have grown to hang 3 feet off the wall. This BioWall is irrigated by just a single drip line installed across the top of the wall, thus reducing the waste.

PROJECT DETAILS

Installed: 2014

Square Footage: 450 SF

General Contractor: Clark Construction

Architect: AECOM/Gensler
